

NEW SERVICES:

FORD WIRELESS CHARGING PILOT

Ford is testing wireless technology that makes recharging as easy as pulling into a parking spot.

STEP 1

Pull into garage
and turn off the car.

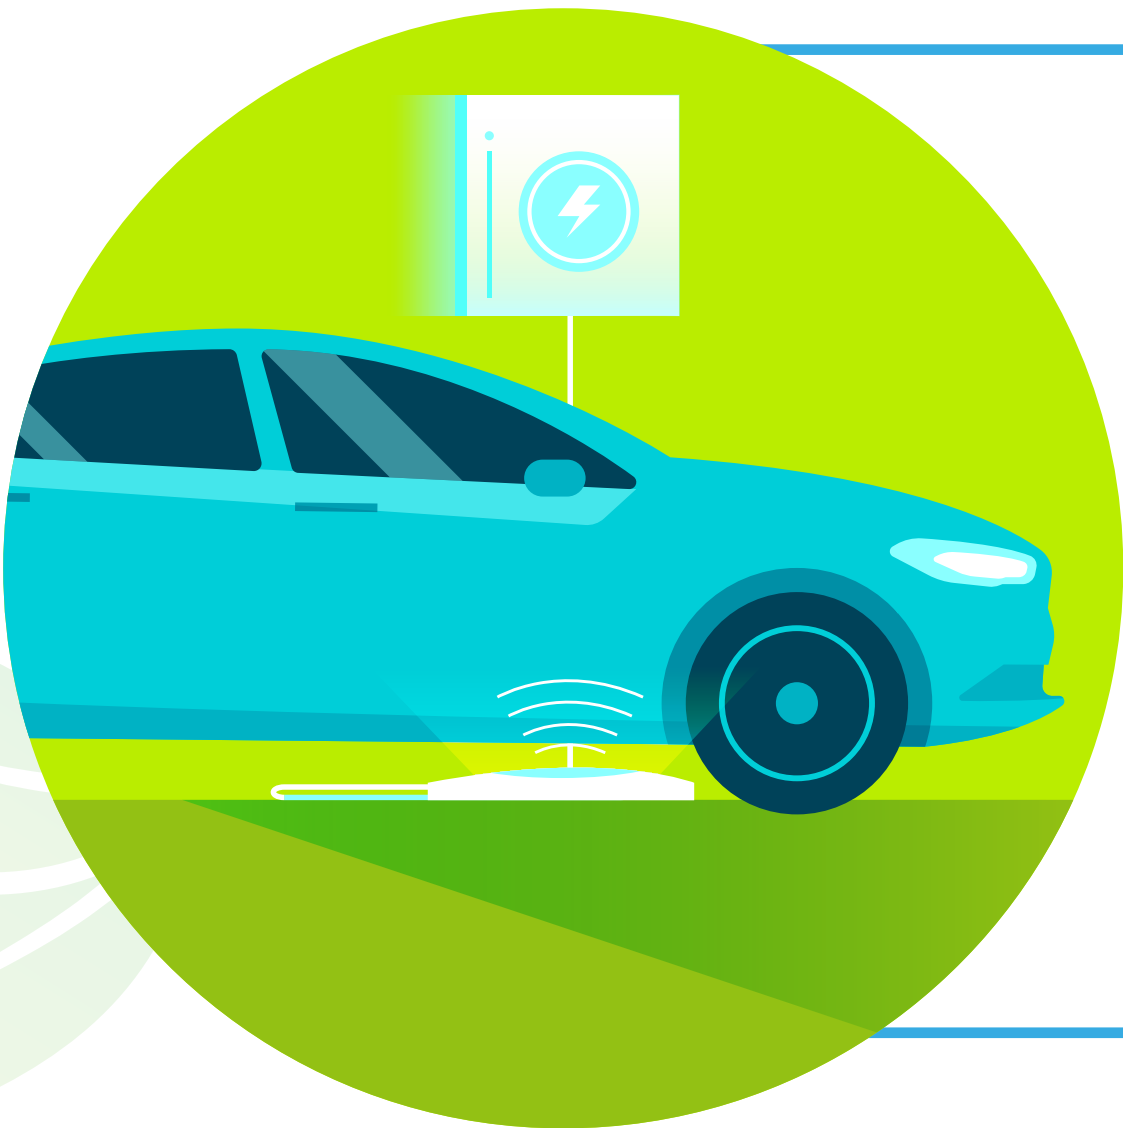

Innovative wireless charging pad conveniently installed in parking space.

STEP 2

Recharge without plugging in.

No need to plug in – electricity is transmitted wirelessly from the charging pad to vehicle almost as fast as using a cord.

STEP 3

Go!

*Recharged and ready to go without needing to unplug.
Back up and drive away.*
