

ANATOMY OF A HANGOVER SUIT

Ford's "Hangover Suit" simulates all the classic hangover symptoms of a throbbing head, feeling tired and weak for the person wearing it

VISION IMPAIRED GLASSES

Give you double vision, decreasing concentration and hyper-sensitivity to light

HEAD- PHONES

Plays pulsating sounds to mimic a migraine headache

BODY VEST AND ANKLE WEIGHTS

Affects balance and slows movement, especially as worn on the opposite limb to the wrist weight

CAP

Together with the goggles, simulates dizziness and a blinding headache

Driving after big nights out – like the Xmas party – can be as dangerous as drink driving

In Europe, research shows alcohol is a factor in 1 in 6 road accident fatalities*
